

Competency Assessment & Recording System (CARS)

Overview

CARS is designed around the concept of National Occupational Standards and the recording of evidence for those in development or maintenance. It is simple to set up and use and is built into learnPro to utilise the powerful reporting system. Current roll out the NHS is for the HealthCare Support Worker Standards managing every aspect but it can work for any role or any standard.

Key Features

- Allows users and reviewers to create links and build up their relationship
- Assign recording to any role with any set of standards
- Powerful reporting system to determine compliance and identify non compliance
- Reviewer and line manager view showing staff in a colour coded format
- Simple roll over facility to show what evidence has not been provided
- Colour coded filtering for reviewers to select standards and the evidence requiring review
- Create the timeframe for standards to be completed
- Add your standards and performance criteria
- Access CARS from the learnpro dashboard
- Record of evidence created for each standard
- Lets reviewers sign off evidence and add comments
- Determine what evidence you want uploaded
- Automate sign off for course passes and e-assessments
- Powerful administration interface to build up a portfolio
